National System of e-Invoices and more

Polish Localization enables the integration of Business Central with the National System of e-Invoices (KSeF), and supports all processes related to data preparation, verification, and exchange, as well as process synchronization and required authentication.

It also allows for the integration of the system with other digital platforms and services, including:

National Official
Business Register
(BIR) online database

NBP exchange
rate tables

VAT Taxpayer
Register

VAT VIES

Comprehensive functionality for companies in Poland

Polish Localization provides a range of functional extensions critical for companies in Poland, such as:

- Financial and Tax Reporting for Poland
- Profit and Loss Statement compliant with Polish legal requirements
- VAT settlement worksheet, support for postponed VAT, and adjustment of VAT settlement dates
- VAT status verification for contractors
- Invoicing and sales processes managed through wizards
- Additional exchange rate for recalculating VAT on domestic invoices issued in foreign currencies
- Classification of goods and services in accordance with Polish Classification of Goods and Services (PKWiU)

- Integration with the National e-Invoicing System (KSeF)
- Integration with government systems such as REGON Database (BIR), National Bank of Poland (NBP), and VAT Taxpayers Register (White List)
- SAF-T preparation and export (including JPK_VAT, JPK_MAG, JPK_PD, etc.)
- Export of the Polish Intrastat declaration
- Split payment fully supported
- Fixed assets accounting compliant with the Polish Classification of Fixed Assets (KŚT)
